The Deputy Director of Central Intelligence

Washington, D.C. 20505

25 February 1983

The Honorable Barry Goldwater  
 Chairman, Senate Select Committee  
 on Intelligence  
 United States Senate  
 Washington, D.C. 20515

Dear Mr. Chairman:

To keep you informed of the Intelligence Community's efforts in the important area of technology transfer, I would like to share with you the results of a Community survey of NFIP resources devoted to covering the transfer of Western technology to the Soviet Union, Eastern Europe, China, and other Communist countries through all mechanisms, both legal and illegal.

The survey included resources devoted to analysis, information processing, collection and staff activities. Community elements involved included the Air Force, Army, CIA, DIA, Department of Energy, Navy, NSA, Department of State, Department of Treasury, and the Technology Transfer Intelligence Committee. Increases in Fiscal Years 1982 and 1983 primarily reflect reprogramming of available resources, while increases for 1984-86 reflect requests for additional resources.

Total work years devoted to technology transfer across the Community totaled about  in FY-81 and  in FY-82. Projected work years for FY-83-86 are as follows:

FY-83  
 FY-84  
 FY-85  
 FY-86

25X1

25X1

25X1

Contractual funds allocated to technology transfer totaled \$114,000 in FY-81 and \$579,000 in FY-82. Projections for FY-83-86 are:

FY-83  
 FY-84  
 FY-85  
 FY-86

SECRET

You should also know that other significant resources that do not appear in the National Foreign Intelligence Program support the Intelligence Community's technology transfer efforts. For example, the U.S. Customs Service, the Department of Energy, and even NSA have non-NFIP resources devoted to technology transfer.

With the increasing attention policymakers are paying to this important issue, we will certainly ensure that the Intelligence Community allocates the resources required both to anticipate and respond to policymakers' needs.

Sincerely,

25X1

John N. McMahon
